Mounting Equipment to Wheelchairs. A risky business ?

Alison Teague, Frenchay Communication Aids Centre

Adrian Hibbert, Toby Churchill Ltd

Mounting electronic assistive technology equipment to wheelchairs has become a difficult area recently. Although many mounting systems are available, the procedures and responsibilities for carrying out this work are unclear. Guidelines from the MHRA stress the importance of a detailed risk analysis but offer little guidance on how to carry this out. This presentation will outline the work of a group of EAT assessment services and companies who have come together to create documentation to help manage the assessment and risk management of the equipment mounting process.
