

RAATE is the only UK conference focused on the latest innovations in Assistive Technology (AT). This conference will interest everyone who uses, works with, develops or conducts research in AT.

27th and 28th November 2006
The Birmingham Botanical Gardens
Edgbaston, Birmingham
Exhibiting: £350 + VAT

Each year **RAATE** attracts a multi-professional, multi-agency audience, including Therapists, Rehabilitation and Clinical engineers, Teachers, Researchers, Suppliers and Manufacturers who share knowledge and experience and meet partners for future work.

As an Assistive Technology company, there are a number of ways in which you can participate. You are invited to:

Exhibit – at least four specified opportunities for delegates to visit the exhibition over one and a half days.

Present a case study – submit an abstract on a new development or case study that you think will interest existing and potential customers.

Sponsorship – an opportunity to extend the placement of your product brand and create a positive relationship with delegates, including:

- sponsorship of drinks reception, raffle or evening meal, poster or training sessions
- provision of delegate bags, pens, paper etc.

Any of these options will allow you a unique opportunity to present your products to an audience of Assistive Technology decision makers.

Why you should come to RAATE 2006

RAATE 2006 will be a unique opportunity to access all professions who work in AT, develop or conduct research or who have a particular interest in this area. The aim of the meeting is to bring these groups together to share their knowledge and experience. A broad trade exhibition will allow delegates to see and discuss the latest equipment in the field. Further information at <http://www.raate.org.uk/exhibition.htm>

To register, contact IPEM: telephone - 01904 610821, or email: meetings@ipem.org.uk
www.raate.org.uk –programme information, registration and proceedings from previous years. There will be a limit on the number of exhibitors this year, therefore please return your application now to secure a place.
